

## CoRover "Conversational AI"

We (CoRover), have developed an **AWARD-WINNING CONVERSATIONAL AI (ARTIFICIAL INTELLIGENCE) PLATFORM**, which is being used by **150 MILLION+ USERS** (10 Billion+ interactions).

**CoRover** is a pioneer in building Conversational AI solutions for Healthcare. We leverage our platform for Healthcare Provider to respond and act on the patients' queries/request automatically, which will significantly be time saving and cost-effective initiative. It improves operational efficiency and provides a revolutionary patient experience. Suggesting to implement AI based IVR & Video Chatbot powered by patent protected **CoRover Cognitive AI Framework**.

### ARTIFICIAL INTELLIGENCE (AI) PLATFORM FOR HEALTHCARE

#### AI Based Video Chatbot

It provides an answers for a set of basic medical questions

#### AI Based IVR

Implement our AI based IVR to book appointments automatically

#### AI Based Virtual Assistant/Chatbot

Implements chatbot in the hospitals' website, mobile app and social media channels

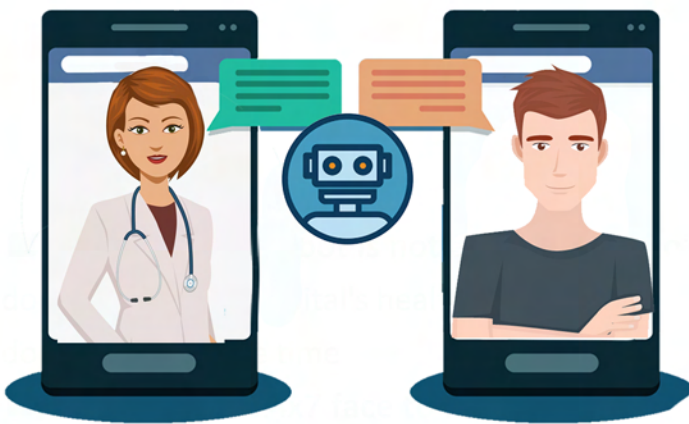

# AI BASED VIDEO CHATBOT

**Video Chatbot (on website/App/kiosk)** provides answers for a set of basic medical questions, which is predefined in the AI & VR space. This is an AI revolution in the healthcare space.

## Benefits of AI Video Chatbot for Hospitals, Doctors & Patients:

- Eliminates the need for a doctor to provide answers for same questions repeatedly. Hence, doctor can focus on the areas of patient's specific illness during consultation.

## Generic questions which can be answered by Video Chatbot

- How much amount of walking needed in a day?
- How many hours a day optimum sleep is necessary?
- What is PMS?
- What is optimum time for women to conceive (age group)?
- How frequently should a women get memo gram/pap smear done?
- Menstrual cycle related queries
- General gynecological health related questions

*...and more...*

- **This Video Chatbot is not a tool for doctor's replacement.** However, this tool is to assist doctors and the Hospital's health care system to enhance the patient's experience and save the doctor's invaluable time
- Patients gets **24x7 face to face** advice from the trusted doctor without having doctors involved to answer common questions
- **Customizable and Topic Oriented Video Chatbot**, which can be frequently enhanced and creates good knowledge base, it can scale out to meet wider patients' needs. Hence serve humanity
- Proactive outreach to patients which increases trust and bonding between doctor and patients

## Revenue Making Opportunity for Hospitals using AI based Video Chatbot

- Hospitals can make it a paid app - subscription model or pay per query (minimum amount can be charged for any answered question). So additional revenue can be made using this bot!

Time Saving for Doctors which can help see more patients, and hence more revenue

Demo of AI based Video Chatbot: <https://youtu.be/eUgMlcn-ekc>

## AI BASED IVR

*"We also propose to implement our AI BASED IVR to book appointments automatically"*

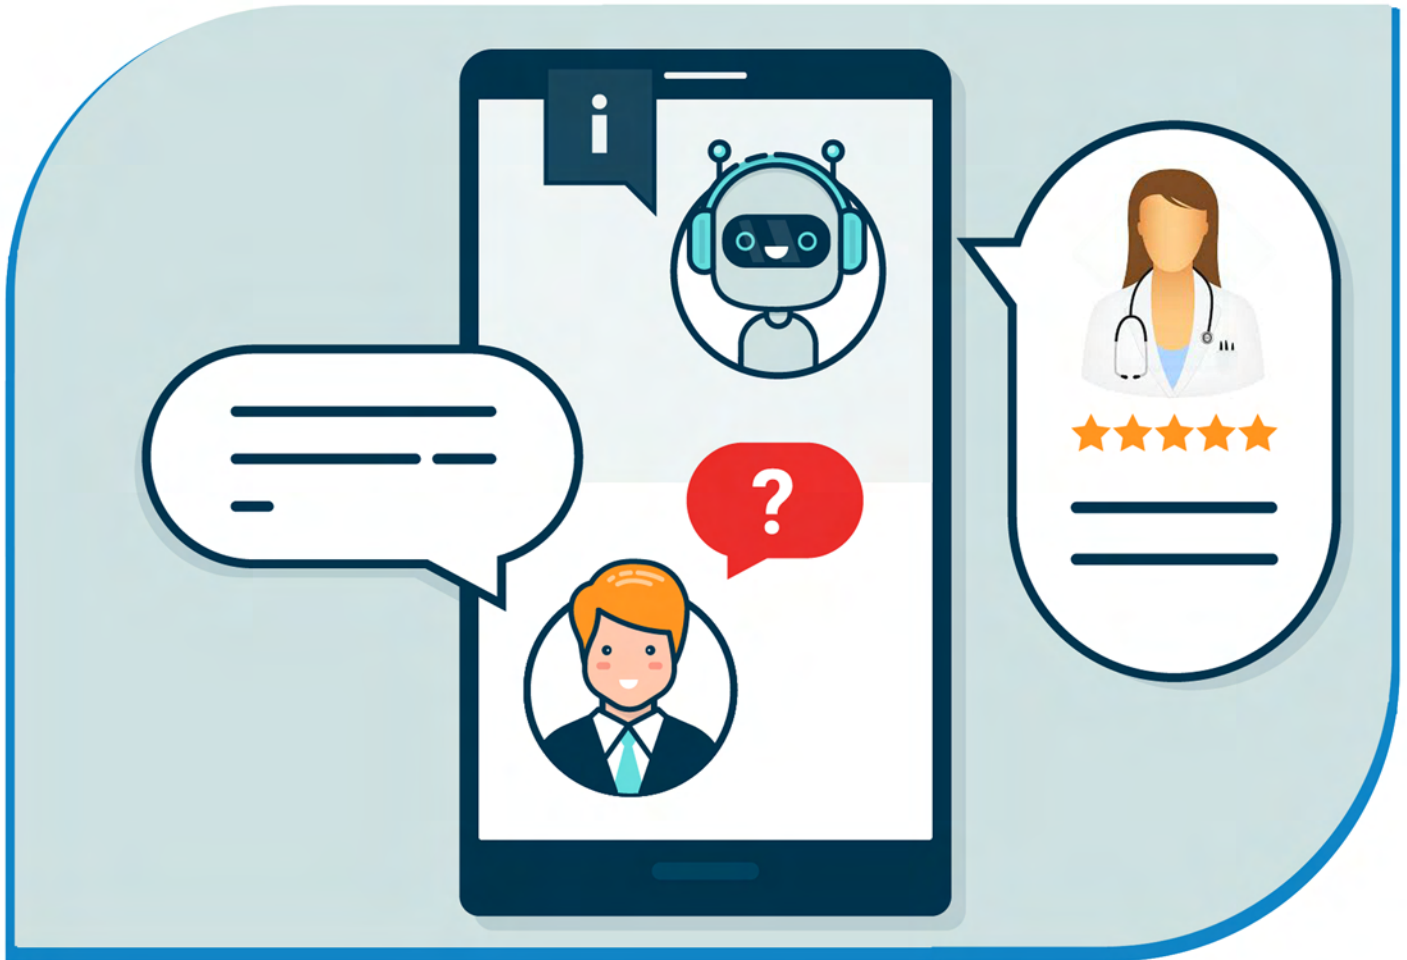

### Benefits of AI based IVR:

- Booking in 1 minute - Patients can book appointment without being on hold on phone and talking to receptionist. Hence, patients would save time.
- Hospitals/clinics will significantly reduce cost of booking appointment/customer support
- Multilingual Support (Regional & Foreign Languages)

Demo of AI based IVR: <https://youtu.be/H4RIHqkHq44>

## AI BASED VIRTUAL ASSISTANT/CHATBOT

We can also implement chatbot in the hospitals' website, mobile app and social media channels (FaceBook, WhatsAapp, Twitter, Line, Telegram, SMS, email etc.) to cater to patients' queries & requests automatically using AI. Text, Voice, Video, Vernacular Enabled!

### Benefits of AI based Chatbot:

- Saves cost for hospitals
- Provides better user experience for the patients
- Saves time for patients
- Patients get verified and quick information 24X7
